Experience

VICTORY PRODUCTIONS Oct 2015 - Current

Digital Media Specialist & Web Developer

At Victory, I've crafted digital learning tools and games primarily for the K-12 educational market. I am responsible for creating and managing digital-related projects.

MASS DIGI May 2015 - Dec 2015

Lead Designer & Tools Programmer

As lead designer, I helped mold mechanics and steer "Hibachi Hero" towards becoming an endlessly fun and memorable experience, that has also been used as behavioral therapy for children with emotional disorders.

I also produced pipeline tools that sped up the progress of asset development and granted our artists the ability to directly interact with code without having to write a single line.
